FIWA WELCOMES STUDENTS BACK TO FIWA!

Return of students to fiwa after Major holiday!

Last this week, FIWA students have came back from their homes and back to School! Some were even participating in things such as Umroh, Or travelling abroad, Which is arguably pretty cool to do in such a short time that is three Weeks.

The Asātidzah & the greater FIWA Family have welcomed back us students with open arms. Remember, A Holiday is supposed to be a break and refreshing from the grueling activity that is Studying, while still maintaining all basic values that we learned in FIWA, of course.

During this holiday, we experienced many things, such as experiencing the last 10 nights of Ramadhan, Eid al fitr and an arguably long holiday, Most of us also went Mudik, and some stayed in their homes.

We at Fitrah Tribune and the Greater FIWA Family hope that with this period of rest, that us students will be able to gain a some Spirit to push even further, reach even higher heights, Do better than last time, and earn better achievements, *Āameen*.

FASTING 6 DAYS OF SYAWWAL PROGRAM

A highly reccomended Sunnah, To be done by FIWA students!

Fasting 6 days of Syawwal is a Highly reccomended Sunnah, As mentioned by our prophet Rasulullah (Peace be upon him): "Whoever fasts during the month of Ramadan and then follows it with six days of Shawwal will be (rewarded) as if he had fasted the entire year.".

Knowing this information, FIWA has officially launched a programme to fast for 6 days in the month of Syawwal, Starting since last week's Thursday, Friday, Saturday, Then this week's Monday, Then thursday, then Friday again.

We at Fitrah Tribune™ Encourage All students and staff to seize Opportunity to gain the reward of a Full year of Fasting! Let us purify our intentions and make the most of these blessed days. May Allah accept our deeds!

MORE CONSTRUCTION PROGRESS

SKYBRIDGE NOW USABLE, UPCOMING CAFE IN GEDUNG C & OTHER INFO

Fitrah Tribune 1st edition FITRAH TRIBUNE NEWSPAPERS *8/4/2026*

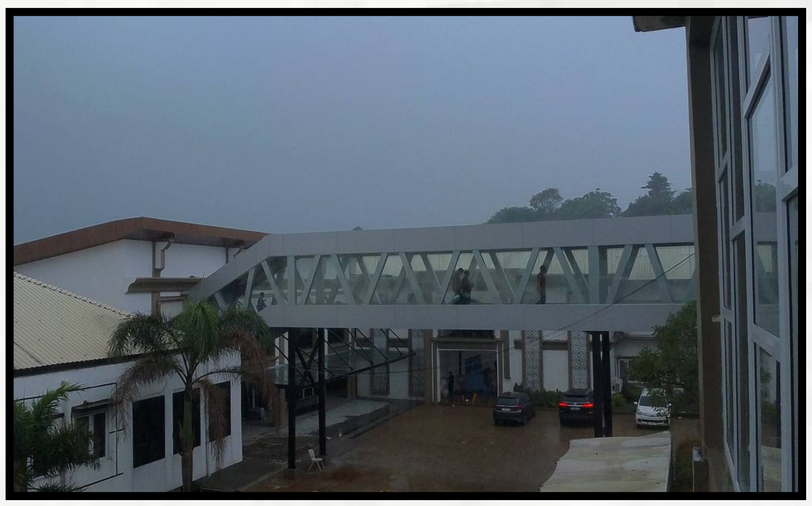

The SkyBridge, once under construction and restricted to public access has finally been opened for use from all FIWA Staff, Students & Teachers!

This marvel of a bridge is one that bridges both the Right wing of gedung A-2 to the currently-being-renovated Gedung C-2. At the end of the stairway there is an Intersection, in which you can go to Gedung B-2, or D-2.

Students' and Staffs' opinions about the bridge are currently Extremely positive, Stating that it is very useful, time-effective, Cool and special. Some students even mention that it is extremely similar to those bridges in Airports, which is reasonable. If you have any reports of or things that can be impoved, report to your PDC!

The SkyBridge was designed a long time ago, more specifically in late 2023. It's construction has been teased and delayed until late 2025, when construction finally started. The stands for the pots that used to be around where the pillars are were actually designed for the Pillar's of the skybridge, or atleast for the short time there was a small roof underneath that same path.

(Photograph of the Skybridge and some students using it during heavy rain, proving its' effectiveness.)

(Render of the corridor next to the to-be Coffee Shop, showing multiple tables.)

(A render of the soon-to-be C2 Cafe, featuring cozy lights & seats,

Following the development of the new Skybridge is the development of Gedung C, specifically C2. According to multiple sources, C2 will be mainly used for something really cool; a Coffee shop!

As seen from the picture above, the Cafe will be spaced with some nice and cozy Sofas and Chairs, and some pretty-luxurious-for-FIWA-standards table. **All of this is subject to change,** so if what we get is different, dont complain >:(

We currently have little info about the Coffee shop other than it's layout, so this is all the information we have. *Author:*

MASSIVE BUILDING BEING BUILT?

As most of us know, there is a massive construction project of a building next to the Basketball court. Most knows about it's existence, but only (at least) a Third of the population in FIWA knows what it's for!

The said building is Building H, More notably known as Gedung H. It's main purpose is to serve as an expansive building, for both Ikhwan and Akhwat. The first floor is going to be an Expansive mosque, Some sources say as big as 4-6 times the size of the current mosque! This mosque will serve as a replacement to the current mosque next to Gedung A. What will the current Mosque become?

Interview

Included in the interview with Ustad Johansyah, mudir of FIWA, **the old mosque will be officially replaced with Administration, Teachers, and other Asatidzah's own rooms!** For a while now, the amount of teachers that FIWA has have been limited to the amount of tables and chairs in the Teacher's room. It is also really nice for our beloved Asatidzah to finally inhibit a much larger space, adjusted for their needs.

With these new improvements, us Students will be able to have More Classes, and overall more space for us to inhabit. And because of this, the current dillema of having too little classes are significantly reduced, letting the entire Gedung A to be full of Classes, and Classes only, Insya'Allah.

It's important to remember that **All of this is subject to change**, since things like this are usually refined after the base concept is made.

FITRAH TRIBUNE NEWSPAPERS

8/4/2026

LOOK AT THOSE TILES!

Included with the opening of the Skybridge, The entire right wing of A2 has been installed with New tiles!

The A2 Right wing tiles has now been switched from old ceramic-like tiles, to New, Wooden tiles/boards! The importance of the replacement of the old tiles with the new wooden tiles are still currently unknown, even for us at Fitrah Tribune. We hope it's because it'll be cooler :D

Currently, the only (new) cons of the wooden tiles is that Dust will be more ~~present~~ noticable than the old tiles. Since the color is different than average shoe dust. And also because C2 Still havent been installed with real tiles.

And also included with this new Tile installation, is the replacement of the now-old Gedung E Entrance Stairs, Also with stairs with wooden tiles! Also included in the interview with School Director Ustad Johan, he revealed that the stairs were actually moved to the right a bit to allow a larger entrance to the Canteen, since the new building (Gedung H) will be the new Mosque, the path to said mosque will be important as well.

In addition, now the stairs has less steeper steps too! Yipee!!1!1 *Author: Ammar MJ*

{Photo of the newly installed tiles, from the recently updated stars)

2 OF OUR ASATIDZAH(S) HAVE OFFICIALLY GOTTEN MARRIED IN THE LAST MONTH!

A really cool thing to celebrate, and a major turning point in their lives! (for the better, insya'allah)

Alhamdulillah, 2 of our beloved Asatidzah have officially gotten married in the last month! Those two Asatidzah are Ustad Rosyid, and Ustad Asyhar!

Ustad Rosyid is a Tarbiyah & PDC teacher who specialises in Diniyah. He is the main guidance of multiple students and is also an Important Ustad in his field. Meanwhile, Ustad Asyhar is an Admin Specialist, and is a part of one of the Backbone of FIWA. His contributions are one of the most important and impactful in FIWA As Well.

We at Fitrah Tribune and the greater FIWA Family say *"Baarakallaahu laka, wa baaraka 'alayka, wa jama'a baynakumaa fee khayrin";* May Allah bless you, shower His blessings upon you, and join you together in goodness!

STUDENTS ACHIVEMENTS

A few months ago, some FIWA Students have joined the KOSSMI Competition (Kompetisi Sains Siswa Muslim Indonesia). This competition is one of the harder competition, with similar structure to OSN.

Alhamdulillah, most of the students have successfully passed the Province (provinsi) level, and is now moving on the National level! One of them even got to the top 20% in math in said province level!

Other than this, some of our seniors, the 12 graders, have officially gotten the results to their applications to their desired universities!

In total, there are around 11-13 students who got into UI, 1 student who got to ITB, and 1 student that got to UB.

It's important to be reminded that this is only few of the students who already got their University applications back and got accepted. There are still alot of 12 graders that havent heard back from their applications.

We hope that more of our seniors gets accepted into more prestigeous universities, other FIWA Students are able to achieve higher achievements in more competitions, and pray that we become like those who have gotten cool achievements, Āameen.

FITRAH TRIBUNE & WEATHER FORECASTS FOR THIS WEEK AND LATER!

FITRAH TRIBUNE NEWSPAPERS

Fitrah Tribune 1st edition *8/4/2026*

PAST WEATHERANDWEATHERFORECASTPREDICTIONS

Big thunderstorms hit FIWA twice last week, and future weather predictions!

Of course, what is a newspaper without some news about the weather? No newspaper or even a general news page is complete without some weather-related stuff! Did you really expect for there to be no Weather-related stuff here? Of course Not!

In the last week, FIWA Has been repeatedly hit with multiple thunderstorms, and extremely heavy rain (classic ciseeng weather), to the point that the thunder strikes were so close that they were extremely loud and almost deafening.

For the next ten days, it will probably stay this way, as multiple weather forecast stations says that there will be heavy storms and rains for the next 10 days. The average temprature is have said to estimated around 32.4, which is still quite normal around here.

The day which this newspaper is Published, the weather forecast has said that there would be an Afternoon Thunder storm or two. same with Wednesday, Friday, Monday & Next Thursday. Thursday is supposed to be cloudy with “A Thundery Shower”, Saturday and Sunday is supposed to have a Night-Midnight Thunderstorm, Next Tuesday and Wednesday is supposed to be a nice rain & thunderstorm.

(Picure of the Parking lot during heavy rain)

With the gradual comings of Summer, we at Fitrah Tribune decided to actually document the weather as it changes to rainy to Dry, and also for the reason that is in the first paragraph, obviously.

NEW NEWSPAPER DIVISION IN FIWA?

Aboutus - FitrahTribune

Fitrah Tribune is a newly founded, Community-Driven Division, Independent from both SOFWA and FIWA itself, with the Main goal of giving highly detailed, interactive, and informational Newspapers! We try our best to write these newspapers with Quality, non-misinformative content, and Up-To-Date content for the pleasure of You! Dear reader! Our current format for making newspapers is all English only, with Minimal AI Assistance, and a new edition of the newspapers every two weeks. Currently, because we are a new Division, we have an extremely limited amount of people in Fitrah Tribune. That’s why we are inviting more people to join our crew!

Because of the fact that Fitrah Tribune is a new “division”, we are prone to making mistakes, and improvements can always be made. If you have an idea that you want to share with ‘us’, give some reccomendations and advice about what to improve, or just want to be part of Fitrah Tribune and make these awesome cool newspapers, contact **Ammar.mufiid@fiwa.sch.id**, and we’d love to discuss all those ideas to become a reality, *Insya’Allah*!

LAUNCH OF ARTEMIS II, GOING BACK TO THE MOON AFTER 50 YEARS!

Fitrah Tribune 1st edition — FITRAH TRIBUNE NEWSPAPERS — *8/4/2026*

ARTEMIS 2 LAUNCH!

Artemis II, themissiontosendastronautsbackaroundthemoonafter +53 years!

"Around The Moon For All Humanity"

(Picture of the Artemis II crew on the SLS Block1 Rocket, Launchingfrom Complex 39B Launchpad)

On April 1st 2026, at 6:35 P.M EDT (Or 5:35 AM WIB), The SLS Block I rocket launched from NASA's Kennedy Space Center, at complex 39B. The same Launchpad where the Famous Apollo Missions & space shuttles launched. The rocket contains the crew of Artemis II, on a mission to send humans back around the moon!

The Artemis II mission is part of NASA's Artemis Mission Line, with the goal to return Humans back to the moon after more than 50 years! The last time a person was in orbit around the moon was back in December 7th-19th, 1972, during Apollo 17.

The main goal of Artemis II is to go around the moon, to perform the first crewed flight test of the Space Launch System (SLS) rocket and Orion spacecraft.

The mission will last around 10 days, and be crewed with 4 Astronauts; NASA commander Reid Wiseman, Pilot Victor Clover, Specialist Christina Koch, and Canadian Space Agency (CSA) Mission Specialist Jeremy Hansen.

The rocket that the Artemis II crew used was the SLS (Space Launch System) Block I, is more than 15% more powerful than the Historic Saturn V, the same rocket that carried the Apollo Missions to the moon.

The Atremis II crew will be on board the Orion Crew Module/Capsule, which is Currently directly connected to the ESA (European Space Agency)/Engine Module. The Engine module will detatch with the capsule just before re-entering the Earth's Atmosphere.

The astronauts are currently on their way to the moon right now, and in 3-2 days, will arive and go around the moon, and be the first humans to lay their eyes on the Lunar Dark side since more than 50 years. During this period of time, we will not have any communications with them for 40+ mins, kinda scary D:

(Poster of Artemis II featuring it's crew and The Moon. Poster from NASA)

In this single mission, there will be 2 Achivements and a new world record;

- Mission specialist Christina Koch will be the first Woman to go around the moon, and thus be the first woman to every lay her eyes on the Lunar Far/Dark side
- Pilot victor Clover, known as the first African-American to stay for an extended period on the International Space Station (ISS), will be the first African-American/Coloured person to ever go around the moon, subsequently being the first coloured person to ever lay his eyes on the Lunar Far side.
- The entire artemis II mission will be the farthest time any humans was from Earth, at a record breaking; 252,756 Miles away from our blue home planet.

The Artemis II crew also took this picture of earth & the moon, as seen in the right

(First pictures from astronauts at Artemis II)
