FIWA EDU EXPO DONE & COMPLETED BY FIWA!

AMAZING!

13TH OF MAY, 2026

EDU EXPO Completed? SOFWA SMP Leadership News? Gedung H plans? Read Now!

SOFWA SMP LEADER SELECTION HAPPENING RIGHT NOW!

The leader of the next SOFWA SMP, now being decided!

Earlier this school year, a new type of SOFWA was introduced by the CAE, which is SOFWA SMP; an OSIS-equivalent for SMP, not just SMA. This opens up opportunities for SMP to have their own SOFWA and experience what it would feel like, while still having the benifits of the normal SMA SOFWA.

The current members of SOFWA SMP Will be replaced soon with the Eight Graders, since the current members are mostly grade 9, they are about to undergo Grade promotion to grade 10, so many of them might leave FIWA Entirely, which is bad!

In standard SOFWA tradition, every end-of-school-year will result in the choosing of a new SOFWA leader, and thus new SOFWA members as well. The goal of this is to perform Continuity of the Organisation, so that it doesnt just end in one generation And now, the new leaders of SOFWA SMP is currently being decided!

The selection is quite complex, to be honest:

The first phase was the Voting Phase.~50% of the voting was done by Students, sent via email by doing google forms, and the rest of the voting was from the Asatidzah from CAE, PDC And more. Then, 10 students were picked from this phase of selection. Those being: Ilyas Prasetyo, Anaqi Ziyad, Dhifna Fawwaz, Fahlevi Yardan, Haykal Alfatih, Ilmy Ahmad,

The second phase has also been recently conducted. Those 10 students mentioned before then had an interview with Ustadz Isrodin & Ustadz Panji, to deem wether they are worthy of moving on the third & Final Phase. 5 Students has been chosen from this phase. Those being; Haykal Alfatih, Yahya Prasetio, Dhifna Fawwaz, Fahlevi Yardan, & Ilmy Ahmad.

The final third phase has yet to be conducted; it should be conducted around Selasa-Rabu, although information about this final phase has been quite vague and is subject to change. Those 5 students will present infront of the Majelis Syu'ro; Which includes the heads/leaders of all the divisions in FIWA, which includes Ustadz Johansyah, Ustadz Isrodin, Ustadz Fian, and more. Though fair warning that **All of this is subject to change.** Even if 4/5 people fail at this phase, they still have the option to be a leader of a Division or be a Secretary thingy.

We hope the best results appear from this selection, the best for all of those who are selected, and the best leader that is in the Grade 8 Angkatan to be selected, *Ameen*.

MORE STAIR UPDATES!

As all of you might've already seen during your walks from the Canteen & back, the stairs leading up E1 has had some changed!

Since the last time it was entirely re-installed during our Ramadhan Holiday, it had finally been improved. The once-exposed right side of the stairs have finally been patched, & the overall condition of the stairs have improved pretty nicely. Also the Light Switch that was once Feet-level is now Higher, so no more people hitting it with their feet >:(

Also included in the upgrade of the stairs is the Addition of Plastic "Windows"... Whatever you'd like to call it. We currently have no idea why it was installed. Because of it, the Roof now extends less towards the stairs, so no more people bumping their head on the celling :D

Writer: Ammar MJ

OPENING FOR EDU EXPO, "MAGIC" TRICKS BY USTADZ IFAN, AND MULTIPLE PERSPECTIVES OF THE EXPO!

Fitrah Tribune 3rd edition | **Fitrah Tribune Newspapers** | *13th of May, 2026*

It is that time again where the students of FIWA bring out the second semester's event, EDU EXPO. An expo where students of each grade and class are formed into groups of five or less. Every group is assigned with a subject they must choose such as: Mathematics, biology, physics, chemistry, english, and much more.

A day before the event, students must clean and prepare their class to present their projects and make it all look good.

The day of Edu Expo, the students of FIWA immediately woke to pray fajr before moving on to prepare themselves wearing their class uniforms before heading into the class for last hour preparation. With time to eat, shower, and buy some snacks and drinks from the good stands just beside the A1& E2 lobby.

At 7:30 student representatives/ leaders are gathered to go to Akhwat aula, where the opening takes place. Parents of said leaders can also participate, listening to introductions by Agasha Hideaka Takijoeddin and Nevan Raziq. With speeches from Ustadz Mahbub, Ustadz Zulkarnain, Ustadz Johansyah, then the unfurling of the FIWA EDU EXPO banner. and finnaly, **a Performance presented by Ustadz Ifan and his assistant, Jiekelano, commonly referred to as Jie (G10).**

**Picture of Ustadz Mahbub giving a speech*

Writer: Naufal Rian, Akio Hideaka & Ammar MJ

USTADZ IFAN'S PERFORMANCE!

After all of the speeches, & the unfurling of the EDU EXPO banner, then came Ustadz Ifan's time to shine. Unlike all the other Asatidzahs that gave speeches & the expo's banner reveal, he had something special planned; a Performance.

It was essentially a "Magic trick" performance, but Ustadz Ifan later said that it wasn't magic tricks at all, and was just normal science. It was more of just.. Tricks!

When he first came upon the stage, he started talkng about how Knowledge is nothing if it's not for Allah, and the fact that it also isn't worth anything if you dont apply & use that knowledge for something of Benefit. To further cement that information to our memories, he performed the first of three tricks:

He took out a piece of Tissue out of the Tissue box on the table next to him (As seen in the picture below), and then mentioned that tissue the same as the Knowledge said before. Then, he said; "Tetapi jika Ilmu itu tidak dipakai untuk hal yang bermanfaat", *Lights the tissue on fire & it dissapears,* "Ilmu Itu akan Hilang."

**Picture of Ustadz ifan doing the Tissue Dissapearing trick, with an edited fire element :D*

The student crowd obviously went crazy because of that because it's quite rare for us students to see tricks like that. But that was just the first out of three tricks.

After that he called his fellow student assistant, Jiekelano (Who will be referred to as "Jie"). He said; "Dan ilmu itu tidak akan masuk tanpa doa Allah, seperti mencoba memasukan koin kepada botol ini" *Jie shows the water bottle and the koin difficult to put inside from the side.*

**Picture of Jie holding the water bottle, Coin inside.*

"Tetapi dengan Doa dan bantuan dari Allah, Koin itu bisa.." Somehow makes the coin enter the bottle from the side "Masuk!"
The student crowd went crazy again, like before, then he revealed that it all was just using Magents hidden in Jie's hand (For more info, ask the man himself).

Then, arguably the coolest, third & final trick happened. This time involving... Me! Ammar!

FIWA EDU EXPO!

PT.2

OPENING FOR EDU EXPO, "MAGIC" TRICKS BY USTADZ IFAN, AND MULTIPLE PERSPECTIVES OF THE EXPO!

USTADZ IFAN'S TRICKS, (CONTINUED)!

Basically yeah, Ustadz Ifan told said that a Person from the Audience should go up to the stage. For some wierd & unknown reason, Ammar MJ was picked.

Then, Ustadz Ifan told Ammar to pick two numbers from 1-5. My (Ammar) two favorite numbers are actually 2 & 7, but because it's only 1-5, i picked 2 and 3.

**Picture of Ammar on the stage, as well as Ustadz Ifan & Jie, during the third trick*

Then he told me to pick, from 2-3, Which number i wanted to give to him. I chose 3. Then the crazy part of the trick finnaly came:

Ustadz Ifan told Jie to try to take something from his Front pocket. He took out a folded piece of paper. And something from his Front pocket. He took out a folded piece of paper. And when he unfolded that piece of paper, it showed a number. My number. The Number three! And Wallahi, all of this was NOT planned by me And/Or Ustadz Ifan or Jie. I just got called randomly.

The cool thing about this trick is that he used a technique called "Forcing"; giving me questions that will end up in the desired answer. So technically, he did predict my number, which was still mind boggling anyway.

Now there was one more final trick and that it is the most important of them all, but it's just way too long to fit in this entire page. I dont want this specific article taking up an entire pages worth of paper, and considering how writing the entire thing will take me around 30 more minutes of writing while it's close to 9 PM is not a good idea, so i'll just end it right about... wait for it... Here!

PERSPETIVES OF ALL THE ATENDEES!

The different perspectives of Students, Parents & Teachers alike!

Students Perspective:

From the Student's perspective, it was quite a Interesting and a rather.. Challenging day. Weeks of preperation have all boiled down to this one day.

The students' projects range from 3D geography maps, to Fire detectors & sprinklers, all the way to the craziest and absolutely maybe a little bit too much, like A LITERAL MODIFICATION OF A MOTORCYCLE (Tim Forza). Turns out that bringing a motorcycle into a class and then revving it is a good marketing plan, and is somehow allowed. It was nontheless very cool though. Kay im getting carried away by this ima continue.

Every EDU EXPO project will have Presentation infront of the Parents/ teachers. most presentations have dedicated Canva/Slides, some just do it straight from the project. Some are good, and some are.. Mid.. But it was all a practice for public speaking anyway.

At the end of the day, the Bazaar was helping us cool down, and the fact that that day was the day SMP was going outing was quite nice.

Parents Perspective:

Thing is about the Parents' perspective, we (and i mean I), wasn't able to get any Interviews with any of the parents. You might see an interview with said parents in the Official FIWA channels, but we dont really know, so all i'm gonna say is the normal stuffs that you can expect.

On the day of the Expo, many parents came to see their son/daughter's Project. The amount of parents should NOT be underestimated. It was ALOT. Like down-the-lake-and-still-theres-cars lot.

Teachers' Perspective:

As challenging as the Expo was for students, so was it for the Teachers. Infact it was prob more challenging for them as for us. Weeks or maybe even ~2 months have all boiled down onto this specific event.

Some teachers like Ustadz panji was presenting about FIWA itself (free advertising?), Some teachers were advising the Student Groups, but most was helping the 'Labour' part of the expo. Yeah thats all i kinda know :v

INTERNAL FIWA NEWS! PT.1

GEDUNG H PROGRESS, BASKETBALL COMPETITION & STUDENT ACHIEVEMENTS!

Fitrah Tribune 3rd edition | FITRAH TRIBUNE NEWSPAPERS | *13th of May, 2026*

HOW'S THE H BUILDING DOING?

Day by day, FIWA has made huge progress towards the ceation of new facillities. Starting from the previously finished, full-functioning skybridge. We can also see the framework of the newly designed administrative building. And to top it off, we can see and hear the construction of the new H building ourselves.

Alhamdulillah, at Friday 8th of May, after Isha, we got the chance to meet and ask the man behind the construction of these new facillities, the director himself, Ustadzz Johansyah.

According to him, these new buildings will be fully established and completed in the new upcoming semester starting July 2026. He states his plans on making the H building as FIWA's new grand building by making the first floor as the new mosque, second floor as the new library, and the third floor as the new multipurpose hall (Aula) topped with a giant dome as it's roof.

Further more, he explains that the G building, located next to the school's swimming pool, will be used as both an office and a homestay for future guests. He also stated the future usage of the current Ash-Shahabah mosque and library as the new multistage laboratory, ready to accompany the future scientists in FIWA. Of course, All of this is subject to change, but we hope it stays better.

And to top it off, He mentioned the approximate completion of the H building to be 90% of the framework. May Allah ease his efforts in making FIWA a better place.

Writer: Fathi Rizqi

**Photograph of the current state of H1, showing major progress on the framework*

STUDENTS' ACHIEVEMENTS

What is a week without a new achievement from FIWA? - alde, the random dev

What would you expect from a week without a new achievement by FIWA students? This week, our smart and prestigious students (or friends) have again, proven their skills by Competing in a OSN-K Simulation.

The ones that did the Mathematics simulation are: Danesh Terra Noktula, Ibad Fadhl, Mikail Arkan Kusuma, Ahmad Rayyan Ghazali, & Ilmy Ahmad Dzikri. All of whom are in the 8D Mathematics class, and others.

And for those who did the science simulation: Ammar Mufiid Johansyah, Dhifna Fawwaz Khan, Hanif Hafizuddin, Fadhlurrahman Fachri Alfayyed & Anaqi Ziyad, all of whom are also in the 8D Science class, and others.

And finally, for those who did the IPS Simulation: Rasyad Madani Pranajahiro grade 7B, Nur Hafla Grade 8D (Akhwat), Muhammad Barran Tirtohamijoyo grade 7B, Ramadhan Padantya Yusuf grade 7A, & finnaly, Rajaya Azka Reian Grade 7A

Last but not least, as you may have heard from Ustadzz Panji from last Jum'at, several students have won the MGMP PAI/continued to the next level. The students are:

- Fahlevi Yardan Ash-shidiq, continued to the Kabupaten level of the competition.
- Zufar Ibrahim Ibadurrahman, got 3rd place in the Musabaqah Hifdzil Quran competition (MHQ)

For the students who haven't gotten their achievements, keep trying, as chances don't only come once! We are waiting for YOUR achievements next week, so show us what you've got!

WEATHER NEWS & AN ANNOUNCEMENT FROM FITRAH TRIBUNE?

Fitrah Tribune 3rd edition | **Fitrah Tribune Newspapers** | *13th of May, 2026*

BORED FROM READING-HERE'S A COOL POSTER!1!

Poster creator: Mgs Asyraf (G7)

FIWA QUIZ:

Who is the person who usually does the content creation part of FIWA?

A. Fadhlurrahman Fachri Al-Fayyed

B. Coach Mido

C. Ustadz Adhi

D. Ustadz Wirza

The answer will be posted next edition!

Quiz Creator: Ammar MJ

WEATHER UPDATES!

The most ~~Boring~~ Amazing cool news section!

This fortnight, **We've not encountered any real extreme weather!1!1** This is one the of the rare fortnights in Ciseeng; No heavy rain, Lots of Sunny days as well. As good as it is now, it might be the start of something that is generally considered bad; Summer.

That's right. All of those sunny days are just *The Calm Before The Storm*, or in this case, *The Humid Before the Dry*. Thing is, as we move into Mid-2026, we're going to encounter Peak Dry season, which is what we usually call by "Summer" here in indonesia. Writing more of this actually makes me not bored by this topic, tbh. To support this, there has been alot of "Excessive Heat" warnings by searching up Weather in Ciseeng (go try it!)

As for the Weather Forecast for the next ~8 days; I dont think it's worthy enough to be put here. Since the predictions of the last two weather forecasts i put here didn't happen at all. But overall, should be around 40-60, 40% and 60% Rainy.

Writer: Ammar MJ

THE FUTURE OF FITRAH TRIBUNE?

Fitrah Tribune is a relatively new 'division' that has been making newspaper(s) for quite some time now. These newspapers usually come out every 2 weeks/a fortnight, but as we close in on the Semester break, this might change.

As we reach the end of this school year, and as our Exams & OSN gets closer; this might be the last edition of our newspaper of this school year.

It has been agreed upon by the entire tribune, since we have to focus back on our Academics. Two of us (Ammar & Fathi) also participates in OSN, which makes this division only harder for both of them.

Other than that, there's also some extra stuff that will come up after the release of this edition!

As of writing, we are currently going to add 2 more extra pages AFTER the release of this edition of the newspaper. Those being; Fun facts/Student Highlights page, & a big Student Challenge Page!

The Fun facts page will contain, well, Fun facts related to Students that most people might not already know. For example, Dimas Bayu's Fishes in the Supervisor lab & other stuff. It's also more of a "misc" page, for news that dont deserve real big articles but worth knowing.

I wont spoiler much about the Challenge, but you might see Fathan Assyauqi come up to the front of the mosque to announce it. And DONT use AI for it, in any way, shape or form!!1!

Writer: Ammar MJ

INTERNAL FITRAH TRIBUNE NEWS!

FITRAH TRIBUNE GETS OFFICIALLY RECOGNIZED BY FIWA? NEW NEWS FORMATS?

Fitrah Tribune 3rd edition | **Fitrah Tribune Newspapers** | *13th of May, 2026*

FITRAH TRIBUNE OFFICIAL RECOGNITION FROM FIWA?

Fitrah Tribune as you all might know by now, is a Community/Division run almost completely and independently by Students. As of the publishing of this edition it currently is not an 'Official' Community recognized by FIWA. But this might change!

During the week that this article is published, We at Fitrah Tribune is currently making preperations to create a Proposal; to discuss about the status of Fitrah Tribune as a Community officially recognized by FIWA, as FIWA's main news broadcaster, both Internally as seen by Students and so on, as well as Externally, for parents seeking to be interested in.

This is big news! This means that our newspapers will be read by a much larger audience; Young & Old, Professional & casual alike.

This will also mean that Fitrah Tribune may get it's own Printer & Ink, so that, well, uhh, we dont waste TU's or the Library's ink :v Because printing ~~6-7~~ 5-7 copies of a single edition of a newspaper, each with 5-8 pages, takes a whole lot of Paper & ink. That means that for every single time Fitrah Tribune creates a new newspaper edition, we use up almost 56 papers! Which is alot.

Also, because we are *Insya'Allah* going to be officially recognized by FIWA, we're also making a new Fitrah Tribune Website! It's still on-the-way, made by Alde, Ammar & a little bit of Claude, but should come in the next fortnight or two.

Writer: Ammar MJ

ABOUT US — FITRAH TRIBUNE

What is Fitrah Tribune? What do they do?

Fitrah Tribune is a Student-Driven Community, Independent from SOFWA itself, with the Main goal of giving highly detailed, interactive, and informational Newspapers! We try our best to write these newspapers with Quality, non-misinformative content, and Up-To-Date content for the pleasure of You! Dear reader!

Our current format for making newspapers is mainly English only, all made with Minimal AI Assistance, and a new edition of the newspapers every two weeks (every Fortnight). Since the last edition of our newspaper, our crew have grown from 8 people, to over 10 People! which, for a FIWA division thats' purpose is similar to that of ours, is already quite large and enough.

We are built & based on 4 major pillars that every member/Tribunee holds. Those being:

1. Clarity – The reliability of the Information Itself
2. Approachability – Without the coldness of Informality, and without the Carelessness of Informality. A warm, nice in-between.
3. Trustedness – The standing of the Tribune as an Institution
4. Transparency – No fact is ever Fabricated, Altered or Misrepresented

Of course, we are still humans & students, so we are not always perfect & make mistakes. But we still always try our best to hold ourselves to those 4 pillars.

Our current members are:
Ammar Mufiid Johansyah (G8), as Founder, leader, Graphics designer & Writer, Aldebaraan Gibran (G7) As the division's IT guy & Part-time Writer Arza Zaydan (G9) as a Writer, Fathan Asyauqi (G7) as a Writer, Main Representative & presenter, Akio Hideaka (G8) as a Writer, Khalifah Agidra (G10) also as a writer, Fathi Rizqi (G11) as a Writer, and Naufal Rian (G11) also as a writer.

We've also gained 2 new members as well! Those being; Shahzha (G9) as our Photographer (Most of the images shown here is from him), & Abyan (G7) As a writer as well.

Get in Contact!

If you have any Complaints/Suggestions that you would like to give us, want to join our Community, or just wanna communicate about something else, Make sure to send an email to **Ammar.mufiid@fiwa.sch.id**!

—EXTERNAL GLOBAL NEWS—
A METOR SHOWER WHILE WE WERE SLEEPING, AND GLOBAL FOOTBAL NEWS!

Fitrah Tribune 3rd edition | **Fitrah Tribune Newspapers** | *13th of May, 2026*

ETA AQUARIID METEOR SHOWER!

while we were sleeping and the clouds were blocking the entire sky, something was happening above those clouds; a Meteor shower, unbeknownst to most people in FIWA.

If you cant already read by the title that meteor shower was the Eta Aquariid Meteor shower. It has started all the way from April 19, but peaking at about 5-7th of May (Tuesday). Some reports say that some students sacrificed their sleeping time by trying to watch the meteor shower, but the clouds blocked the sky in Ciseeng :(

The Eta Aquariid Meteor shower was much different from the Gemenids meteor shower that happened in December. That meteor shower had a big majority of 7th graders & above watching. The meteor shower was Slow, alot of meteors, & came from an Asteroid. Meanwhile the Eta Aquariid meteor shower came from the remnants of the well known Haley's comet. The meteor shower was Fast, mush less meteors, and suprisingly more visible from the Southern Hemisphere! But still the clouds won D:

Writer: Ammar MJ

**Photograph of the Eta Aquariid Meteor Shower at night, i dont know where it was taken from though :v*

THE SEMESTER BREAK IS CLOSE, BUT FOOTBALL IS GETTING INTERESTING!

EUROPEAN COMPETITIONS, WORLD CUP AND PREMIER LEAGUE

The semi-finals of UEFA Champions League (UCL) was finished and the finals will be the most interesting finals of all time. Arsenal, winning against Atletico Madrid in the 2nd leg with 1 goal. Securing the spot in the final after 20 YEARS!.

Paris Saint-Germain (PSG) also contended the finals again that will be held in Budapest. They level the Bayern Munich 1-1 in the 2nd leg. But in the 1st leg. Bayern lost 5-4 to PSG. 9 goals entered the net in the last 2 weeks. Then last week, they had a draw. Even though Bayern was very frustated on the 2nd leg. They tried very hard, 15 shots, 577 passes. But Harry kane finally give a goal to their team at 90+4th minute.

In the UEFA Europa League (UEL) , Aston Villa reached the final. With a comeback against Nottingham Forest by 4-1. They will have a big percentage of winning, because their rivals will be a rarely-heard team.

Have you guys seen the Premier league standings yet? Well now, there is a title race finally happening in England. Arsenal consistently in the 1st place, But Manchester City really wants to reclaim that place. Arsenal has a pretty easy game. They will literally fight against middle-board teams. While City can be a bit struggling in the bridge of conquering the title.

Tottenham finally took off their threat from degradation by winning 2 matches in a row. Making them 1 point above West Ham.

Manchester United has officially entered the UCL again since 2 seasons by beating liverpool. Liverpool and Aston Villa are also trying to qualify for the big tournaments. They will meet on May 16th. Maybe this is the tkey point for Aston Villa to survive. But if hey win the UEL, they get a free, quality ticket to UCL. So either win the final or play 2 games in league without losing.

We all ever heard right the world cup hosted by 2 nations in 2002. At Japan & South Korea. But this time, it will be hosted by 3 nations.

Total stadiums will be used in the 2026 World Cup

- America = 11 Stadiums
- Canada = 2 Stadiums
- Mexico = 3 Stadiums

The first match will bring Mexico against South Africa.It will be the First match of them since World Cup 2010 at South Africa! Where the Iconic goal of Tshabalala Made.
And the first match of 2026 World Cup Will be Held At Estadio Azteca.The stadium is the silent witness of Pele's 3rd World Cup Trophy And The FIRST Maradona World Cup Trophy..

Later in the semester break, we will have a massive advantage. It starts from 12 June - 20 July. Where we can watch them. Watching in the nights? oh no no no. Many matches start at 02:00 or 08:00. So you can watch while having a breakfast or with your family.

MAJOR MOTORSPORT NEWS, & A NEW VIRUS OUTBREAK?

Fitrah Tribune 3rd edition | FITRAH TRIBUNE NEWSPAPERS | *13th of May, 2026*

MIAMI, SPA, MANDALIKA... ALL CHAOS!!

MOTORSPORTS NEWS!!1!

Alright how will i tell you this? So for the last 2 weeks we saw, what could be, one of the most unbelievably chaotic weeks in racing history. Let's be honest here, you only live once to see a week like this especially as a pure motorsport fan. But there is a lot to cover and so for this i will explain different racing tragedies that occurred this week so you don't have to!

Formula 1 - Miami GP: The weekend was special as it featured a sprint race on the same day the official qualifying happened. The sprint was surprisingly entertaining with multiple side-by-side battles, fair racing and of course the current World Champion Lando Norris taking the win fairly, ending Mercedes dominance. The race was chaotic though as Gasly was flipped upside down in a crash, however, walking away with no injuries. Kimi Antonelli lifts the trophy in miami for the 3rd time. we wait as in 2 weeks time, Montreal will be next in line.

WEC - Spa 6 Hours: A week after open-wheel racing in the Americas, we head back to europe, specifically, Belgium. A 6 Hour endurance awaits. A full line-up of GT3 and Hypercar set to race around the infamous circuit. The race was a chaotic one with fan favourite, ferrari, crashing out. Entertaining battles and crashes saw the hypercar class won by BMW and LMGT3 won by the #10 Mclaren after Vista Ferrari suffered from a heavy 5-second penalty.

GTWC - Mandalika: Indonesia's pride circuit becomes a battle ground for GT3 racing. Hosting their 2nd year in GT racing. The infamous starboy of Indonesia, Gelael, finishes 3rd although not finishing his 2nd race in the weekend. The race is specialised to keep gelael ready for the upcoming spa 6 hours

Writer: Khalifah Agidra

**Image of Sean Gelael driving during the GT World challenge Asia 2026, at the Pertamina Mandalika International Circuit*

A NEW DEADLY VIRUS SPREADING?

In early May of 2026, reports of a virus spread piqued people's interest and many have been wondering if this is a new wide spreading virus.

It began with the expedition of the MV Hondius cruise ship, a modern polar-class vessel built in 2019. Built for passengers for a wide-ranged leisure vacation. While meant to carry passengers, this specific journey instead carried 80 crewmates from Antarctica to Manila, Philippines for a maintenance stop.

About 10 days less or more, crossing the pacific ocean, several crewmates fell ill, having intense fever, muscle aches, and fatigue. Within a week Some even had breathing problems, with test confirmation that it was a Hantavirus, the Andes virus, spreading through close human-to-human contact. As time passed in the confined vessel, the virus has spread among the cabin mates and caregivers in the ship.

Because the MV Hondius was already set t arrive at Manila, Philippines, worry has already settled that they might spread the virus further upon docking onto public shores.

Alerting to the Philippines Department of Health, the Bureau of Quarantine immediately planned a strict isolation dock for the ship to land. By the time it did and the crewmates were immediately evacuated, with reports of 17 confirmed cases and 4 fatalities.

While this virus may seem dangerous it should be known that it is transferred by the contact of rodents. While it does pose a danger it is not viral enough to actually be called as an outbreak, and it needs a long time human-and-human contact for it to actually take a full effect

Writer: Naufal Rian

Image of The MV Hondius that got hit by the Hantavirus
