FIWA GOES TO TAMAN SAFARI FOR EXCURSION!

NEW!

4/27/2026

FIWA Excursion? Global Oil Crisis? EDU EXPO? This and more!

TREE NEXT TO THE BASKETBALL COURT CUT DOWN?

A tree next to the right side of the basket ball taken down?

For a long time in FIWA's lifespan, tens of hundreds of plants have been planted within the Academy, large or small. Upon the 23rd of April, 2026, chainsaw sounds were heard coming near the Basketball court, while some students were playing there. Following those noises, multiple people spotted a person or two (Information is vague), climbing the massive tree, chainsaw in hand, cutting down the major branches of the tree. A large tree branch with it's leaves fell upon the Court's field, restricting student access to the court for some time, before it was then cleaned up and removed from the court.

Following the chainsawing of multiple of it's branches, the entire tree was completely removed from the area. We at Fitrah Tribune currently do not know the reason for this removal, other than maybe blocking sunlight or becoming too much of an obstacle for students, however we have a theory.

Trees grow Massive roots, roots that are very strong and can grow extremely long. These roots are even strong enough to destroy rocks and go through thick strong walls, which is probably why it has been removed.

Some of our team hypothesised that those roots may be causing damage to the surrounding areas, especially Gedung D, and with the removal of the tree, the removal of the roots may begin, and healing to the nearby underground structures.

We hope that no matter the intention, it will bring a Positive impact towards FIWA and the people living withinin it, Aameen.

Writer: Ammar MJ

FIWA EDU EXPO FINNALY GETTING CLOSER!

The once-in-a-school-year Event, EDU EXPO, is coming soon!

Ah yes, EDU EXPO. One of the major student events that happens every year. EDU EXPO is about students ideas/innovations turned real, where we actually make our ideas. It serves as an important training for us students, for creativity and inventiveness, which is all important skills in the real world.

Multiple topics have been chosen by the CAE, and those multiple topics have been chosen by the students themselves. They range from Robotics, Biology, Chemistry, Physics, and even stuff like Geography! Overall, there are alot of topics, and alot of students are following those EDU EXPO Topics. (Most probably because they are forced to, not sayin that it's negative :v).

Insya'Allah, EDU EXPO Will be held on the 2nd of May, 2026. About 5 days away from the publishing of the newspaper, so i hope most of you are ready to show your innovation to the world!

Also, the event will also include a Bazaar, with lots of food, which is really really nice. We at fitrah tribune currely have no major information about what shops will be at the bazaar and what they'll be showing, so just hope that one of them sells something similar to that of an Indomie or something, since, well, who doesnt want some indomie?

Well, i still can go yapping on about how the EDU EXPO Will be, but like, i think i already covered literally everything that is to be said about it, and i dont want to waste more ink from the printer, Okay thats enough for me, good luck on Edu Expo Guys!

**Logo of EDU EXPO 2027, with the motto; 'Inovasi Santri Untuk Negri'*

FIWA GOES TO TAMAN SAFARI!

FIWA EXCURSION TO TAMAN SAFARI HAS BEEN CONDUCTED!

Fitrah Tribune 2nd edition FITRAH TRIBUNE NEWSPAPERS *27/4/2026*

The date was April 22, 2026. The day where the students and teachers of FIWA finally go on an excursion to Taman Safari. The started with the room teachers of FIWA waking its students, who are either awake, taking a shower, heading to the mosque or even still asleep, as azan Subuh calls. After prayer, an ustad informs all of the students to get ready as the busses would arrive at 6:00 Am. As soon as everyone departed from the mosque and headed for either the dorms to take a shower or prepare their stuff, or going to the cafeteria to have some breakfast. After they were all done, the ustads called upon the student to gather at the courtyard, everyone grabbed their belongings and headed for the courtyard, as they are all arranged to their respective groups. After a few sayings from the ustad, especially one to keep our manners as a muslim and represent FIWA as its students. At 6:30, the students of FIWA were all directed to their designated busses. As soon as everyone was on board and the ustads taking attendance, before the driver arrives to the wheel and proceeds to drive away, taking the students on a 4 hour trip to Taman Safari.

Immediately after the busses departed from the school gates, the ustads distributed snacks for the road to all of the students. The track the bus took was similar to the one fiwa took for Mukhayyam. On the road the students would either sleep, look outside, eat their snacks, talk with each other, etc. By the time we were nearing Taman Safari(30 mins away), many other buildings are to be seen around that area, a perfect spot is actually one of the few hotels of Taman Safari. Safari Resort. Passing through some narrow paths in the mountain that's when the bus passed by a monument of cement animals, indicating they have neared Taman Safari. After a few miles and passing some trees, the bus found itself on the road with the other busses, piling into the same one way road into a resting area for busses. While resting, students were allowed to head to the bathroom, while others either stayed in the bus, or had a stretch outside for a while. Not before long, everyone was called back to their bus and soon after, we entered Taman Safari.

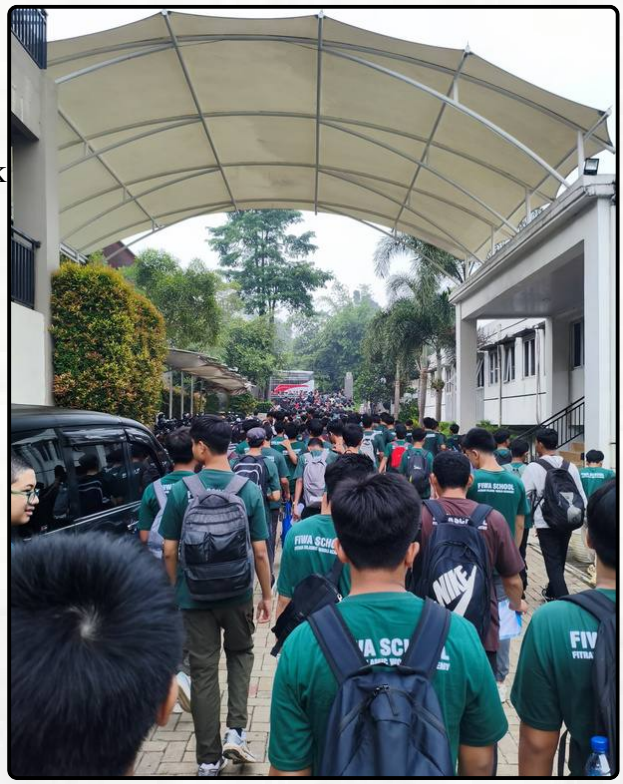

**Image of the students walking towards designated buses.*

Upon entering, the bus is met with another road which turns out to be the attraction, Safari Journey. The students are able to witness animals as the bus drives through roads and even a water filled area. A variety of animals are able to meet face-first. Met with a variety of animals, most of which are non-hostile and are often free to themselves. Though if you happen to be outside the park, you might've noticed stands selling carrots. Purchase some and you can feed the animals. Though there are some parts of the Safari Journey that set up signs warning of animals you should not open your windows to. Such as lions, tigers, and bears. Then after all of that great greeting, the Safari Journey introducing everyone to the heart of Taman Safari, the park

Once arrived the students all got out of the bus, called out to a line once more before taking a picture with the banner of Fiwa's arrival to Taman Safari. The students were once more reminded of their intentions there before being given a worksheet for them to complete.. The students in their groups and their guiding ustad truly begin their journey, exploring Taman Safari. Such exploration can lead to activities or even areas such as the bird zone, The Taj Mahal, The baby zone, restaurants, food stands, a recreation area, and the many spots to see many other animals, animals shows, and the Panda Palace! While remembering their manners and performing their daily prayer.

From 3:00 PM to 4:00 PM, the students of FIWA were called back home, another long 4 hour journey back to school. By arrival, the students immediately prayed the nightly prayer before settling for dinner and rest.

EXTREMELY LONG BLACKOUT & FIWA STUDENTS' ACHIEVEMENTS/COMPETITIONS

Fitrah Tribune 2nd edition FITRAH TRIBUNE NEWSPAPERS *27/4/2026*

THE POWER CUT NOBODY EXPECTED

FIWA has a long history when it comes to blackouts and powercuts. Recently, almost once a week, students witness their air conditioners, smartboards, classroom lights, and the entire of FIWA's Wireless Fidelty (Wi-Fi) system neutralized and deactivated within a few minutes or 1-2 hours. These blackouts have become part of our daily life and we got used to it. But the thought of an elongated powercut, that totally neutralized an entire floor for days, never crossed our minds. Yet that catastrophic event occured. Right in front of our eyes.

With more equipments added to FIWA's tool arsenal, not to mention new upcoming buildings with added features, it makes common sense that FIWA experience powercuts and adjusting their power needs. Moments before it happened, we study in class like a normal day. Then, lights went out. We thought this could be a normal day but Unfortunately, while we were waiting for the electricity like a usual blackout, the lights won't turn on in a strange time gap. Even after class, we don't know when does the power come back and when we head towads the mosque, only the A2 floor, or the seniors floor, are the ones that ran out of power. The other floors and buildings are totally fine and properly working. And after some findings and reportings from technicians, some of us realized the powerbox located in the back of the teachers room, has experienced high temperatures and malfunctions due to excess usage for powering FIWA's facillities.

But Alhamdulillah, in the last few weeks, correctly 4-5 days periode, technicians of FIWA are able to restore power bit-by-bit into A2 floor. In the first few days, every class has at least 1 of their items powered for example, class 11A has their AC and lights left without power, but the whiteboard still works. And after a few weeks, FIWA's A2 demand for power supply has been met once more.

**image of the Hallway during the first phase of the major blackout, more than 12 hours after the beginning*

STUDENTS' ACHIEVEMETNS

Student's competition progress, mutiple vicotries, and more!

FIWA is also focusing on many competitions. On 12th April, The selection for *Olimpiade Bahasa Arab* (hence OBA) has been done and in this regard, Dhifna and Anaqi pass the selection and will be the representative of our precious school.

Another competition which has been announced loudly for Junior High School. Competition MGMP PAI helded by the Ministry for Kabupaten Bogor. Including Ciseeng. Our Da'i and latest khatib Fahlevi Yardan will be at the Speech Competition. He won the internal selection with 91 points, a pretty high one. Zufar or what we sometimes call as "King Zufar" will be tested with Juz 30 and 2 other surahs outside of Juz 30. LCC or Lomba Cerdas Cermat, a team competition and FIWA's representative will be our famous boy Haykal, Azfar and Qaiser. Favian Azfar will also join the olimpiade competition. He got 125 correct answer out of 150 questions. Lets pray for them so they can get good score in the competition.

Meanwhile, 7 Student joined the KSN competition last Sunday. This is a national competition and it is also curated with PusPresNas. Some of them join mathematics, IPS, Biology, Chemistry, English and Bahasa Indonesia. They will receive the final result on 28th April. Let's pray to Allah so they will get good score after the competition. Ameen

On the other hand, Fadlurrohman Fachri Alfayyad, known as Ifadh, got the top 50 students in KossMI. KossMI is similiar with OSN but the question is more integrated with islamic about the movement of months in Islam, about ayat, and etc. It is national competition and many muslim students compete in that. What a beautiful Achievement. May Allah always bless him and give him simplicity.

FITRAH TRIBUNE & THE PAST AND FUTURE WEATHER NEWS

Fitrah Tribune 2nd edition — Fitrah Tribune Newspapers — *27/4/2026*

PAST WEATHER AND WEATHER FORECAST PREDICTIONS

Lots of sunny days, rainy days, and big thunders hit FIWA within the last Fortnight!

Like i said in the last edition of the newspaper, absolutely no piece of news is finished without some news related to the Weather, even though this is a really boring topic. Yes, i'm lookin at you Arza. This is our rule for newspapers in Fitrah Tribune, and it could never, NEVER be broken, no matter how boring or unnecessary.

In the last fortnight, we've encountered around only 4-5 days of rain, including only 2 heavy hunderstorms, which is quite rare for Ciseeng to have. However, those thunderstorms are NOT to be underestimated.

The first heavy thunderstorm was one of the very-heavy rain types, the ones that usually happens once in 2 weeks (or commonly referred to as a Fortnight). It was the type of strong thunderstorm that has winds that would absolutely blow the rain water into the Right wing of A2, making it very wet.

The second heavy thunderstorm was during the return trip from taman safari, on Wednesday. the thunders were exteremly loud, lasted almost an hour, and were very close to the bus while we were still in it.

WEATHER FORECAST PREDICTIONS:

Upon the day of publishment of this edition, there is an expected Thunderstorm or two, same with.. uhh, literally every day after that until sunday... oh god. Hey atleast next monday is gonna be rainy! Yeah ciseeng weather is just, brutal, i guess.

ABOUT US - FITRAH TRIBUNE

Just what is the newspaper division? This and more, now below!

Fitrah Tribune is a Recently founded, Community-Driven Division, Independent from both SOFWA and FIWA itself, with the Main goal of giving highly detailed, interactive, and informational Newspapers! We try our best to write these newspapers with Quality, non-misinformative content, and Up-To-Date content for the pleasure of You! Dear reader!

Our current format for making newspapers is mainly English only, with an indonesian version that comes up slightly later than our English version, all made with Minimal AI Assistance, and a new edition of the newspapers every two weeks (every Fortnight). Since the last edition of our newspaper, our crew have grown from just 3 people, to over 8 People! which, for a FIWA Division, is still modest though. However, for a news-making division like us, this is already enough.

Our current Tribunees (members) are: Ammar Mufiid Johansyah (G8), as Founder of this division, Aldebaraan Gibran (G7) As the division's IT guy, Arza Zaydan (G9) as a Writer, Fathan Asyauqi (G7) as a Writer and english-indonesian translator for the indonesian version, Akio Hideaka (G8) as a Writer, Khalifah Agidra (G10) also as a writer, Fathi Rizqi (G11) as a Writer, and Naufal Rian (G11) also as a writer. The person currently writing this text, is of course, Ammar MJ.

Here are some of what our tribunees have to say about themselves!

My name is Fathan Assyauqi Hiliry. Here Insya allah I will be giving some sports news especially football and some specific news that I like to do. I was invited by Ammar when he first made this tribune. Ammar told me that I'll be making it in Indonesia. But, oh cmon. Football in Europe was dominated by England. How come I can't make it in English language. Last edition, The founder said "What is newspaper without weather". I say "What is newspaper without Football?"

I'm Aldebaran Gibran Altaf, the lead developer for the upcoming Fitrah Tribune website and the IT guy for most of the technologies Fitrah Tribune has. I mainly work with the classic HTML/CSS/Java trio. I use GitHub (unblock github pls) because why not? It's easy to use and I just like it to code. NEVER expect the upcoming website to be bug free, because I'm not experienced enough and some other reasons I may not tell you

Hi there, i'm Ammar Mufiid Johansyah, the founder, Graphics Designer and leader of Fitrah Tribune.

My inspiration to making this newspaper 'Division' was due to the extreme amounts of rumors and misinformation in FIWA, and thus, we, Fitrah Tribune will be the main distributor of True, non-false Information, like a Lighthouse illuminating the dark night in a storm, Thus our Logo & Our Philosophy

MORE CONSTRUCTION PROGRESS & PLANS FOR SAID CONSTRUCTION PROJECTS

Fitrah Tribune 2nd edition FITRAH TRIBUNE NEWSPAPERS *27/4/2026*

WILL C2 BE SIMILAR TO THE RENDER?

Gedung C2, which is showing significant progress, might actually looks like the prediction render!

The Gedung C renovation that is currently on hand has shown considerable progress, with the most visible one being the C2/3 Progress.

For those who haven't read the last edition of the newspaper, C2 will be filled with the Cafe/Coffee shop, which will 100% be popular. There was a render, about the prediction of the structure and how the cafe is gonna be like. The render could be seen in the Image next to/below this text. It includes Cozy yellow lights and a special architecture similar in the lobby of gedung A1.

In the last fotnight, C2 has recieved quite some progress. As you can see in the photo below this text directly, it is the progress of C2. Compared to the render, it actually do resemble it pretty nicely. The tiles, celling shape and overall walls are very similar to the prediction. The only thing that's left is the Seating and Tables, if its gonna be similar to the image or not. We hope it will, but Wallahu'A'lam, Only time can tell.

Writer: Ammar MJ

**Picture of construction progress in C2*

TOILETS NEAR THE POOL FINALLY ABLE TO BE USED!

Toilets that have been in building progress is now usable!

The toilets next to the pool, the one in gedung G, that has been in construction progress for quite some time, are now *mostly* available for use! The toilets are surprisingly clean and very spacious, getting very positive feedback from Students.

Unfortunately, the toilet rooms, actually do not have Toilets, or atleast not all of them. They usually have Shower heads and the place to put your clothes and your showering utensils. They also have black tiles that are really cool. You can actually put maximise the shower output and like, make it go flinging everywhere, its really cool.

Writer: Ammar MJ

CONSTRUCTION SAFETY 🚧 NOTICE 🚧

⚠️ *Important Safety Protocols During Construction* ⚠️

Due to ongoing construction activities, including the repeated movement of large cement construction vehicles for casting and concreting of the building in front of Mat'am, new construction safety protocols have been implemented.
These new protocols are:

1. Don't walk straight to the D Dormitory when a casting is ongoing (for the students)
2. Stay away from restricted/construction zones
3. Follow staff instructions at all times
4. Do not stand near moving vehicles
5. Be alert and avoid distractions (Playing sports near the area, etc.)

And for the Cement trucks:

1. Put a heavy object (like a brick) to clog the wheel of the construction vehicle
2. Don't forget to pull the vehicle's handbrake
3. And don't forget to turn the vehicle off

These rules are implemented to ensure student safety and prevent accidents in high-risk construction zones.

⚠️ *Failure to follow these protocols may result in serious injury.*

🚨 *Safety is everyone's responsibility.*

Writer: Arza Zaydan

EXTERNAL GLOBAL NEWS

GLOBAL OIL CRISIS, FOOTBALL SHOCK AND MOTORSPORT DISASTER

Fitrah Tribune 2nd edition | **Fitrah Tribune Newspapers** | *27/4/2026*

GLOBAL OIL CRISIS CAUSED BY MIDDLE EAST WAR?

As of today, the global oil crisis has seen fall and rise in prices and quantity over these past few weeks. The crisis is mainly caused by the closure of the Strait of Hormuz with reports seeing prices rise as ~70% in the US and all over the world. The tension around the strait of hormuz has unfortunately seen reports of rising tensions with an unlikely possibility of ceasefire.

COUNTRIES MOST AFFECTED:

This week has seen countries around the world affected by the oil crisis and countries particularly around asia, took a huge impact in price increase.

The countries affected were:

1. Japan
2. China
3. India
4. South Korea
5. India

What has Indonesia done to avoid the crisis?

Reports suggest that Indonesian diplomats and economic staff are looking in an alternative oil delivery route suggesting immediate affect towards other countries willing to export their oil to our beloved country.

Another plan is set by Indonesia for Pertamina to secure supplies needed for over approximately the next 20-23 days in order to survive the crisis.

Amidst the destruction, Pertamina has successfully secured various shipping routes for import and exports through Asian countries like Russia, as well as theUS, and other middle eastern countries. Reports indicate that diesel reserves stand at approximately 18 days-though this figure represents a crisis buffer, not a countdown, as Pertamina continuously replenishes supply. This gives the company time to secure longer-term alternatives and maintain economic stability. FIWA is not (directly) affected.

EUROPEAN FOOTBALLS ARE SURPRISING!

If no news is complete without Weather, i say "What is news without football?"

After the win against Burnley, Manchester City climbed up once more into 1st place after 23 months. Despite being 2nd, Arsenal won against Newcastle by 1 scored by Eze in 9th minutes and repositioned the winning place for the league title. Surprisingly, our well-known 2 big six teams is suffering. Chelsea lost in 5 games in a row. And Tottenham Hotspurs were placed at 18! Yes 18! The one who won the Europa League competition. Liverpool surpassed Aston Villa and took back his aura as a previous league winner. Even though sitting at 4th spot, it's a pride for them to still qualify for the championship league. Portugese Midfielder, Bruno Fernandes is so close breaking Kevin de Bruyne and Thierry Henry records for 20 assist. The winning match against Chelsea create bruno's stats into 18 assist. 3 more and surpasses the best midfielders in Premier League.

Sadly, after 8 seasons.Wolverhampton is officially going into the EFL Championship. Losing 30 games this season. Even though it has 6 games remaining. It won't help anything to reach 19th place

In western europe, Barcelona keep their 1st spot again in La Liga. Separated by 11 points with Real Madrid. Of course, as we always and always know

The French striker from Real Madrid, Kylian Mbappe has 24 league goals. Again spotting the Golden Boot in la liga. But from the bottom board, Mallorca's striker is also targeting with 21 goals.

Lets jump Southearn Europe. Inter Milan is also a powerful contender for this season title. 25 wins with 78 points, 2nd place? separated with 9 points. Below Inter Milan, 4 teams are fighting for UCL. AC Milan, Napoli and Juventus is having a tryhard progress to make them stay in Top 4 to qualify into UCL.

In Germany, of Course Bayern and Dortmund will qualified

On Tuesday and Wednesday, UCL Semi-Finals will start! Lets see who can raise our eyebrows

Writer: Fathan Assyauqi
